

## FOOD VENDOR QUALIFICATION PACKET FOR EVENTS AT PUBLIC FACILITIES

Thank you for your interest in providing concession or catering services for public events at public facilities owned by the following public Entities: City of Grand Junction, Mesa County, City of Fruita and the Town of Palisade. These public Entities have joined to establish a cooperative process that allows a qualified food vendor to be pre-qualified to work any public event, private- or Entity-sponsored, at any of the facilities owned by the public Entities. In addition, these Entities work with certain private Main Event sponsors to provide information to food vendors (see page 8) and a list of interested vendors to the sponsors.

With this process, food vendors only need to submit the required qualifying documents listed in this packet once (*per vehicle, trailer, booth, etc.*) annually and then may apply to event coordinators for as many events held at public facilities as they desire. Qualified food vendors will be listed on the Concessionaire and Caterer Information web page serving all four Entities and maintained by the City of Grand Junction. The web page can be found at:

[gjpr.org/vendorinfo](http://gjpr.org/vendorinfo)

Private- or Entity-sponsored event coordinators are required to choose from the qualified list on the web page if their event is held at a public facility.

Note: This process is not an application for any event. Application for specific events is a separate process. Contact the event coordinator.

## Fire Suppression Requirements

### What do I need?

All mobile food preparation vehicles whose operation uses appliances that produce smoke or grease-laden vapors require an operational permit annually. These permits are issued by these local fire departments or districts: the Grand Junction Fire Department, Lower Valley Fire District, Clifton Fire Protection District, or the Palisade Fire Department. Vendors only need to obtain a **single permit from a local fire department or district**. The term "grease" refers to animal and vegetable fats and oils that are used to cook foods or that are a byproduct of cooking foods. For mobile food preparation vehicles that don't use these appliances, a verification letter provided by a local fire department or district stating that an operational permit is not needed shall be required. Vendors only need to obtain a **single letter from a local fire department or district**. Operational permits and verification letters are valid until December 31st of the year issued and are required to be obtained annually. Failure to obtain or maintain a valid operational permit or verification letter could jeopardize participation in this program and is a violation of the International Fire Code.

### What's looked at?

Operational permit requirements include, but are not limited to:

- **Exhaust hood** - Cooking equipment that produces grease-laden vapors shall be provided with a Type I kitchen exhaust hood in accordance with the 2018 International Fire Code (IFC).
- **Fire protection** - Cooking equipment shall be protected by an approved automatic fire extinguishing system, with a current system inspection by a qualified individual, in accordance with the IFC. Portable fire extinguishers, both Class K and Class A:B:C, shall be provided in mobile food preparation vehicles as required by the IFC.
- **Cooking oil storage tanks** - Cooking oil storage tanks within mobile food preparation vehicles shall comply with the IFC.
- **Liquid propane (LP) gas systems** - Where LP gas systems provide fuel for cooking appliances, such systems shall comply with the IFC. A UL 1484 Listed propane alarm is required to be installed and hardwired into the electrical system in mobile food preparation vehicles equipped with propane appliances.  
**Compressed natural gas (CNG) systems** - Where CNG systems provide fuel for cooking appliances, such systems shall comply with the IFC. A listed and approved methane alarm is required to be installed in vehicles equipped with CNG appliances.
- **General Fire Code and Life Safety** - All mobile food preparation vehicles are required to comply with all electrical, exiting and egress, combustible storage, and hazardous materials and activities requirements of the code.

### How do I get a permit?

To obtain a Mobile Food Preparation Vehicle Operational Permit, contact one of the fire department's or district's Fire Prevention Bureau or Division to schedule an inspection. The inspection will last approximately 30 minutes. Upon a successful inspection, a permit will be issued. If the inspection results in a failure, a reinspection must be scheduled after corrections have been completed. Permits are only issued to mobile food preparation vehicles that have successfully passed the inspection.

If an operational permit is not needed for your operation, verification of this by the fire department or district is required. Contact one of the fire department's or district's Fire Prevention Bureau or Division to coordinate this verification. If it is determined that an operational permit is not needed, a verification letter stating this will be provided.

### I want to know more!

Additional information on permitting requirements can be found on all the valley's fire department's and district's websites. If you have specific questions, please contact any of the agencies listed on page 3 of this packet.

## Insurance Requirements

The selected Concessionaire or Caterer agrees to procure and maintain, at its own cost, policy(s) of insurance sufficient to insure against all liability, claims, demands, and other obligations assumed by the Concessionaire or Caterer pursuant to this Section. Failure to procure or maintain insurance as required below could jeopardize participation in this program.

Every policy required shall be primary insurance, and any insurance carried by the Owner, its officers, or its employees, or carried by or provided through any insurance pool of the Owner, shall be excess and not contributory insurance to that provided by Concessionaire or Caterer. No additional insured endorsement to any required policy shall contain any exclusion for bodily injury or property damage arising from completed operations. The Concessionaire or Caterer shall be solely responsible for any deductible losses under any policy required below.

Concessionaire or Caterer shall procure and maintain and, if applicable, shall cause any Subcontractor of the Concessionaire or Caterer to procure and maintain insurance coverage listed below. All coverage shall be continuously maintained to cover all liability, claims, demands, and other obligations assumed by the Concessionaire or Caterer pursuant to this Section. **Submit this page to your insurance agent so they can confirm that you have the required coverage and to obtain the required Certificate of Insurance and Endorsement.**
